# how to measure for your **NEW BATHROOM**

While Reico can come and measure for you if you choose, measuring your bathroom on your own doesn't have to be difficult. All you need is a tape measure, pencil and the provided floor plan grid. Use the sample grid below as a guide and create a sketch of the room.

- Start in one corner of the room, select a wall and measure the distance in inches of every item on that wall from the corner. Write all measurements on your sketch.
- Go to the next corner and locate every item on the next wall in relationship to that corner.
- Continue to measure all around the room, until everything is located, measured & marked on your sketch
- Jot down the overall lengths of walls, height of room and distance of every item from the floor – your outlets, light switches, soffits, ledges, etc.

Measure carefully and double check all measurements. Measure from outside of casing to outside of case. Mark direction of door swing(s) on provided floor plan grid. Mark exact location of sink, drains, gas lines, electrical outlets & switches on the provided floor plan grid.

WINDOWS				DOORS
