KITCHEN & BATH

**KITCHEN  
PLANNING GUIDE**

**Let's get**

**started!**

The amount of time for any kitchen project will vary by the scope of each project. A straight tear and replace with little to no design changes that uses in stock cabinets and reuses appliances can be done in weeks or less depending on schedules and how quickly decisions are made.

A complete kitchen remodel requires more time, effort and teamwork in every facet. Careful consideration needs to be given to multiple product and design decisions, which involves time and effort making both decisions and changes to layout and design.

It is important to understand the process. If something is not clear, ask. Remodeling is a roller coaster of emotions. In every scenario, patience wins. Let our Reico Kitchen & Bath designers expertly guide you every step of the way. It is what we do and what we've done since 1952.

Now it is time to learn about your kitchen project. Let's get started!

### A word about wood and painted finish characteristics

Wood naturally offers variations in color, grains, pattern and texture, creating a uniqueness that adds to its appeal. These natural characteristics can not be hidden in finishing and are not to be misinterpreted as defects.

Painted finishes also features unique characteristics derived from the wood underneath. Imperfections and natural characteristics of wood will stand out even more on a smooth painted finish. These are to expected and not considered a defect in the workmanship or finish.

## COUNTERTOP DETAILS

Material

Granite	Laminate	Stainless Steel
Quartz	Solid Surface	Marble
Wood	Concrete	Cultured Marble

Sink Type (select all that apply)

Single Bowl	Drop-In
Double Bowl	Farm/Apron Front Sink
Undermount	Prep/Bar Sink

Faucet (select all that apply)

Pull-Down	Two-Handle	Pot Filler
Pull-Out	Touchless	
Single Handle	Prep/Bar Sink	

## Granite or Quartz? Top Choices in Countertop materials

Yes, you can choose marble, wood, solid surface, soapstone, even laminate and much more for your countertop, but for most it comes down to granite or quartz.

- Granite – natural stone that is resistant to breakage, scratching and burning, naturally porous and requires periodic sealing.
- Quartz – typically engineered from ground quartz and resin bonded under high pressure to create a non-porous, scratch resistant surface.

## APPLIANCE DETAILS

Existing Appliances to be kept (select none/all that apply)

Refrigerator	Trash Compactor	Cooktop
Microwave	Oven/Range	Dishwasher
Hood	Wall Oven	

New Appliances (select none/all that apply)

Refridgerator	Trash Compactor	Cooktop
Microwave	Oven/Range	Dishwasher
Hood	Wall Oven

## MEASURING YOUR KITCHEN

All you need is tape measure, pencil and piece of paper.

Starting in a corner, select a wall to measure.

Note the total length of the wall plus every item on that wall and distances between.

Repeat for all walls until everything is marked on your sketch.

Note heights for door openings, windows, floor to ceiling and floor to soffit (if applicable)

For windows, measure outside of casing to outside of casing.

For doors, mark direction of door swing.

Mark locations of sink and appliances.

Mark locations of outlets and light switches if possible.
